MOHAMMED AKBAR K

FLUTTER DEVELOPER | CROSS-PLATFORM MOBILE ENGINEER

Malappuram, Kerala, India | +91 9846475854 | makbarkozhikkal@gmail.com

linkedin.com/in/mohammed-akbar-k | github.com/mohammedakbark

PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of hands-on experience across internships and professional roles, building cross-platform Android and iOS applications in fintech, logistics, automotive, education, and marketplace domains. Experienced in Flutter, Dart, Clean Architecture, Provider, Riverpod, BLoC, REST APIs, WebSockets, payment integrations, and app-store releases. Combines conventional software development with structured AI-assisted and agentic workflows, including custom Claude Code skills, commands, agents, hooks, and MCP tool integrations. Focuses on maintainable code, automated testing, code review, and application security and compliance checks.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android, iOS, cross-platform application development
Architecture & State Management: Clean Architecture, Provider, Riverpod, BLoC, GetX, reusable components
APIs & Real-Time Features: REST APIs, WebSockets, API integration, push notifications, localization
Backend & Data: Firebase, Node.js, MongoDB, SQLite
Testing & Quality: Unit testing, widget testing, integration testing, code review, application security checks
Release & Collaboration: Google Play Store, Apple App Store, Git, GitHub, Bitbucket, Jira, Postman, CI/CD
AI-Assisted / Agentic Development: Claude Code, Cursor AI, ChatGPT, MCP integrations (Jira, Figma), custom skills, commands, agents, hooks, prompt engineering
Development Tools: Android Studio, VS Code, Xcode, Microsoft Teams

PROFESSIONAL EXPERIENCE

Software Engineer | Zil Money

US-based fintech product company | Manjeri, Kerala, India | October 2025 – Present

- Develop and maintain cross-platform Flutter applications within a fintech product suite supporting business payments and financial workflows.
- Contribute to multiple products, including OnlineCheckWriter (OCW), ZilRemit, Virtual Cards, Get Paid Link / Payment Link, Check Mail, Document Mail, and Payroll by CC.
- Implement features and API integrations using Clean Architecture, secure authentication, and reusable components for maintainable application code.
- Publish and maintain applications on both the Google Play Store and Apple App Store, including build configuration, versioning, release notes, and ongoing updates.
- Use Claude Code and other AI tools for structured AI-assisted and agentic development; create reusable skills, commands, agents, and hooks to automate repeatable development tasks instead of relying only on one-off prompts.
- Work with MCP tool integrations such as Jira and Figma to support development workflows, task context, and design-to-implementation activities.
- Review both AI-generated and manually written code; use unit, widget, and integration tests to assess correctness and maintainability, and follow application security and relevant compliance checks.

Flutter Developer | Crisant Technologies

Service-based software company | Mysuru, Karnataka, India | August 2024 – October 2025

- Worked directly with clients through requirement discussions and project meetings, translating business ideas into mobile application scope and practical implementation plans.
- Handled multiple Flutter applications from solution planning and development through deployment, supporting clients in automotive, logistics, education, and marketplace domains.
- Implemented application features using Clean Architecture, Provider, Riverpod, and BLoC, with REST APIs, WebSockets, push notifications, localization, and payment integrations as required by each project.

SELECTED PROJECTS

- **Dazzles —** Stock, delivery, and logistics platform with role-based modules, parking management, and push notifications.
- **WheelsKart —** Used-vehicle auction platform with live WebSocket bidding and a 100+ point vehicle inspection checklist.
- **Bhasha Sagar —** Multilingual learning application with dynamic localization and BLoC architecture.
- **F9 Cars —** Car-wash booking application with customer and staff modules, QR-based login, vehicle status tracking, and PhonePe payments.
- **Test Management —** Railway asset testing application with GPS-based inspection workflows and REST API integration.
- **Animaline.in —** Marketplace with listings, favorites, premium plans, WebSocket live chat, and payment gateway integration.

Flutter Developer | Softroniics

Malappuram, Kerala, India | November 2023 – July 2024

- Built and maintained enterprise and consumer Flutter applications, contributing to features such as QR-based login, PhonePe payment integration, GPS-based location services, and WebSocket-driven live chat.
- Combined development responsibilities with student mentoring and training in Flutter full-stack mobile development; prepared learning material and syllabus topics, created practice problems, and guided students through practical exercises.

Flutter Developer Intern | Edapt

Malappuram, Kerala, India | May 2022 – November 2023

- Contributed to real project work by developing Flutter UI screens and integrating REST APIs under the guidance of senior developers.
- Built foundational experience in state management, Git workflows, and software testing while contributing to application development tasks.

EDUCATION

Bachelor of Commerce (Computer Applications) | University of Calicut | 2020 – 2023

First Class | Overall Grade: B

CORE COMPETENCIES

End-to-End Mobile Application Delivery • Client Requirement Discovery • Cross-Platform Development • AI-Assisted and Agentic Development Workflows • App Store Publishing and Maintenance • Code Review and Automated Testing • API and Payment Integration • Application Security and Compliance Checks • Technical Mentoring
